

SASSA Group

Global Standards. Timeless Values.

Who We Are

An institutional approach to global commodity trade

SASSA Group operates as an institutional trading and execution framework, connecting verified commodity sources with structured transactions and disciplined execution.

The framework ensures transparency, risk control, and reliable outcomes across global commodity supply chains.

The Group

An institutional trading group operating across the physical commodities value chain

SASSA Group is an international trading company operating in the physical commodities sector.

We combine direct access to resource origin with institutional-grade trading and execution standards.

Market Context

The current state of global commodity trade

Despite growing volumes, global commodity trade remains fragmented and opaque.

Along with structural inefficiencies, weak documentation standards, and elevated execution and compliance risks.

Core Market Challenges

What consistently undermines trust

01

Fragmented information
and poor visibility.

02

Excessive intermediaries

03

Weak documentation
standards.

04

Limited execution control.

Structural Gap

What the market is missing

The market lacks a single institutional operating framework that integrates verified origin, structured trading, compliance, and execution under unified control.

The Role of SASSA

A new execution-driven category

SASSA Group addresses this gap by governing transactions through execution-led structure, rather than acting as a broker, aggregator, or digital marketplace.

Integrated Operating Model

Origin → Trading → Execution

SASSAGROUP

Direct Upstream Access

Access to real production assets

We work directly with producers and extraction sites, providing verified access to actual production capacities, confirmed volumes, and transparent on-site operations.

Upstream Value Creation

What upstream control delivers

01

Verified volumes and capacities

02

Aligned technical specifications

03

On-site quality control

04

Clean documentation of origin

Trading Discipline

Structured international trading

Our trading activities are anchored in documentary discipline, transparent commercial terms, predictable logistics corridors, and compliance-driven routing decisions.

Execution is a system.

Execution as the Core

Execution is a system, not a phase

At SASSA Group, execution is not a function or stage of the deal.

Execution is a controlled operating system that governs all actions across the transaction lifecycle.

Execution Platform

A unified operational flow

- 01 Deal structuring
- 02 Documentation governance
- 03 Compliance screening
- 04 Logistics coordination
- 05 Execution control and reporting

Governance & Trust

Trust is created by structure

Institutional trust is established through clean documentation, defined mandates, embedded compliance, and full audit readiness from the outset.

Built-In Compliance

Compliance by design

01

KYC and AML screening

02

Sanctions and jurisdiction checks

03

Route and counterparty verification

04

Inspection and reporting controls

Product Focus

Where execution quality matters

We operate in markets where stable supply, verified origin, and disciplined execution are critical for buyers, institutions, and long-term relationships.

Strategic Positioning

Not a broker. Not a marketplace

SASSA Group is an international trading company with an institutional execution architecture at its core, designed to govern complexity rather than amplify it.

SASSAGROUP

Origin.

Trading.

Execution.

SASSA Group operates on global standards, disciplined execution, and long-term institutional trust.
