

Corporate Profile

SASSA Group is an international trading group operating in the physical commodities sector, combining upstream resource access, structured trading, and institutional-grade execution.

The Group builds an integrated supply model from verified resource origin to coordinated cross-border delivery, supported by disciplined documentation and controlled execution processes.

Core Activities

SASSA Group operates across upstream access, international commodity trading, and transaction structuring, supported by a global network of partners and mandates.

The Group integrates document verification, compliance awareness, and process control into its commercial activity.

Operating Model

SASSA Group applies a structured, mandate-driven approach to transaction execution, where all participation is aligned within a defined commercial and documentation framework.

The model is based on clarity of structure, controlled engagement, and repeatable execution across jurisdictions.

Execution & Platform

Execution is treated as a controlled system rather than a transactional function.

SASSA Group operates through an integrated platform combining document verification, transaction structuring, logistics coordination, and execution oversight into a unified flow.

Governance & Commercial Orientation

SASSA Group maintains a governance-driven approach to commercial activity, where transparency, documentation integrity, and process discipline are embedded across all stages of execution.

Trust within the Group's model is established through structure, not assumptions.

Global Footprint

SASSA Group operates across key international corridors including Latin America, MENA, Asia, and the Caspian region, supporting diversified and coordinated supply flows.

SASSA Group

Global Standards. Timeless Values.
